

The Roll-n-Vac® :

- Removes stagnant green slime water
- Removes water from winter covers
- Makes sand filter changes fast & easy
- Excavates soil and water around buried pipes & wires, when used with a pressure washer
- Vacuums liners in place
- Cleans clogged or blocked lines
- Blows out lines for winterization

Sometimes you just gotta suck it up! We take the pain out of sand filter changes.

Wheel barrow not included

The Roll-n-Vac® is designed for heavy duty performance. It **saves time** which **saves money**.

Lifts Water 12 Ft High

Made in USA

www.roll-n-vac.com

Use only on contractor grade steel wheelbarrows that hold 500 lbs. The lowest cost wheelbarrow that we recommend is the Jackson. Jackson does NOT make a 2-wheeled wheelbarrow. A 2-wheel conversion kit is made by Marathon Industries part # 20285. We recommend 2 wheels to prevent tipping.

Features and Benefits

- Collects large volumes of material quickly and easily.
- 1-Year Warranty
- Uses a standard 120 vac 15 amp line.

Powerful Performance

“Great idea, great machine. Absolute time saver. With the amount of sand changes and clean outs we perform I expect this to pay for itself in the first year in labor costs.”

**Fritz McKenzie Pres.
ABCS Pool Service WAYNE NJ**

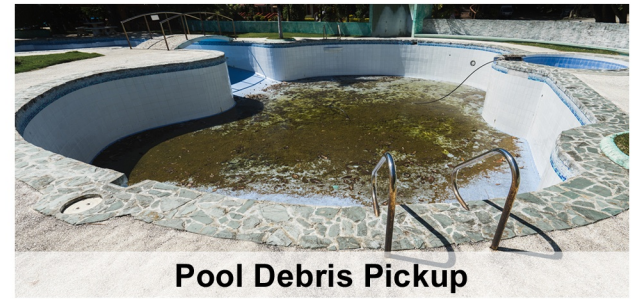

“...It removed wet filter sand in under five minutes. Typically it would take me 40-60 minutes to complete that task with a traditional wet dry vac.”

Trevor Gans, Tri-State Pools, Inc.
